# Websocket in Nginx Proxy Manager

Einrichtung Websocket für Vaultwarden:

```
location:           /notifications/hub
scheme:             http
```

```
forward-hostname/ip:  IPvonVaultwarden
port:                 3012
zahnradmenü:          proxy_set_header Upgrade $http_upgrade;
                      proxy_set_header Connection "upgrade";
```

```
location:             /notification/hub/negotiate
scheme:               http
forward-hostname/ip:  IPvonVaultwarden
port:                 8080
```
